**Description:**

The CB-Series Collector Boxes are used when multiple Auto-Draft® VSAD or FSAD Inducers are needed on one stack.

**Materials:**

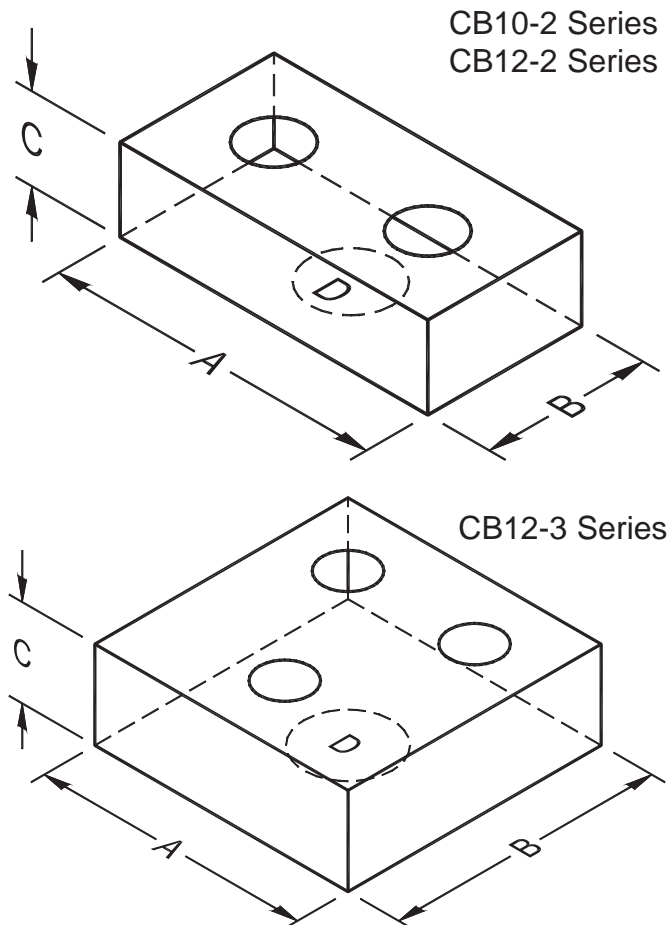

The CB Series Collector Boxes are made from 304 Stainless Steel. Each corner has an 8" long steel leg so the Collector Box is not sitting directly on the roof.

**Installation Notes:**

Top surface of the Collector Box must be level when installed. Stainless steel mounting hardware is strongly recommended for its strength and corrosion resistance. Ensure proper bracing and mounting methods are utilized to properly support the combined weight of the Auto-Draft® Inducers and Collector Box.
